GetInsured Presentation on EDI and Reconciliation

GetInsured Recon Files vs. FFM Recon Files

- Several carriers inquired about how the GetInsured platform is able to accomplish comprehensive monthly reconciliation using only one inbound file (RCNI) and one outbound file (Discrepancy Report) each month.
- SSHIX and GetInsured reviewed the catalog of recon files utilized by the FFM, and we were unable to identify any scenarios which would not be accommodated by the GetInsured recon methodology, provided that carriers are able to implement GetInsured's RCNI specification as defined in the Carrier Reconciliation Guide.
- SSHIX will be happy to provide special accommodations for RCNI testing in order to allow adequate time for carriers to implement the GetInsured Specification. We believe carriers will see a substantial return on this development effort in terms of a simplified reconciliation processes.
