June 8, 2020

The graphs below represent the total number of Qualifying Life Event (QLE) Special Enrollment Periods (SEPs) granted from December 16, 2019 through May 30, 2020. This includes regular SEPs as well as the Exceptional Circumstance Special Enrollment Period (EC-SEP).

The graphs below represent the following breakouts, reporting enrollment figures which include: the total number of all QLEs granted for the Special Enrollment Period from Dec. 16 to May 30 of 2020 for Qualified Health Plans (QHPs) only, QHPs and Qualified Dental Plans (QDPs) for the EC-SEP that the Silver State Health Insurance Exchange (Exchange) opened to Nevada consumers in response to COVID-19, as well as QLEs granted for Income Changes, and coverage resulting from a Loss of Minimum Essential Coverage (MEC).

Section 1:

This section displays the number of QLEs during the regular SEP. The Exchange’s typical SEP is any time period outside of the Exchange’s Open Enrollment Period from November 1 to December 15. The first graph demonstrates completed applications due to traditional QLEs that have turned into enrollments at the household level. The second graph entitled Total SEP Enrollees demonstrates the total number of individual enrollees.

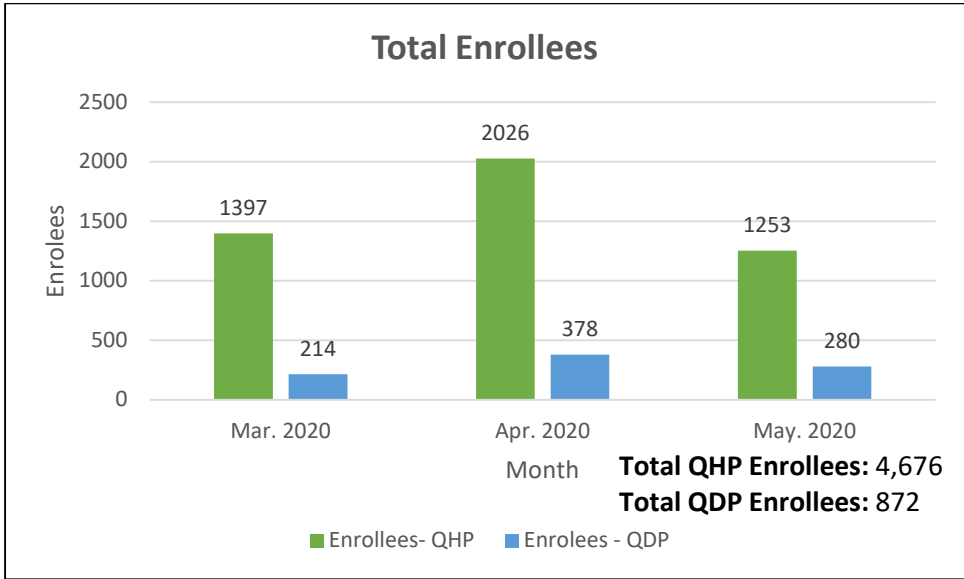

Section 2:

This section displays the number of EC-SEP applications received, the number of applications that turned into enrollments, and the total number of individual enrollees. The first graph demonstrates the total number of applications received from March 17, 2020 through May 15, 2020. The second graph entitled Applications that turned to Enrollments demonstrates the total number of applications that turned into an enrollment at the household level. The third graph demonstrates the number of individual enrollees.

Note: This data includes those enrollments for both Qualified Health Plans (QHPs) and Qualified Dental Plans (QDPs).

Section 3:

This section illustrates QLE applications received during the regular SEP that turned into enrollments, at the **household level**, and were related to either Income Change or Loss of MEC. The second graph shows the total number of **individual enrollees for enrollments** that occurred during the regular SEP due to Income Changes or Loss of MEC.
